3. User Persona

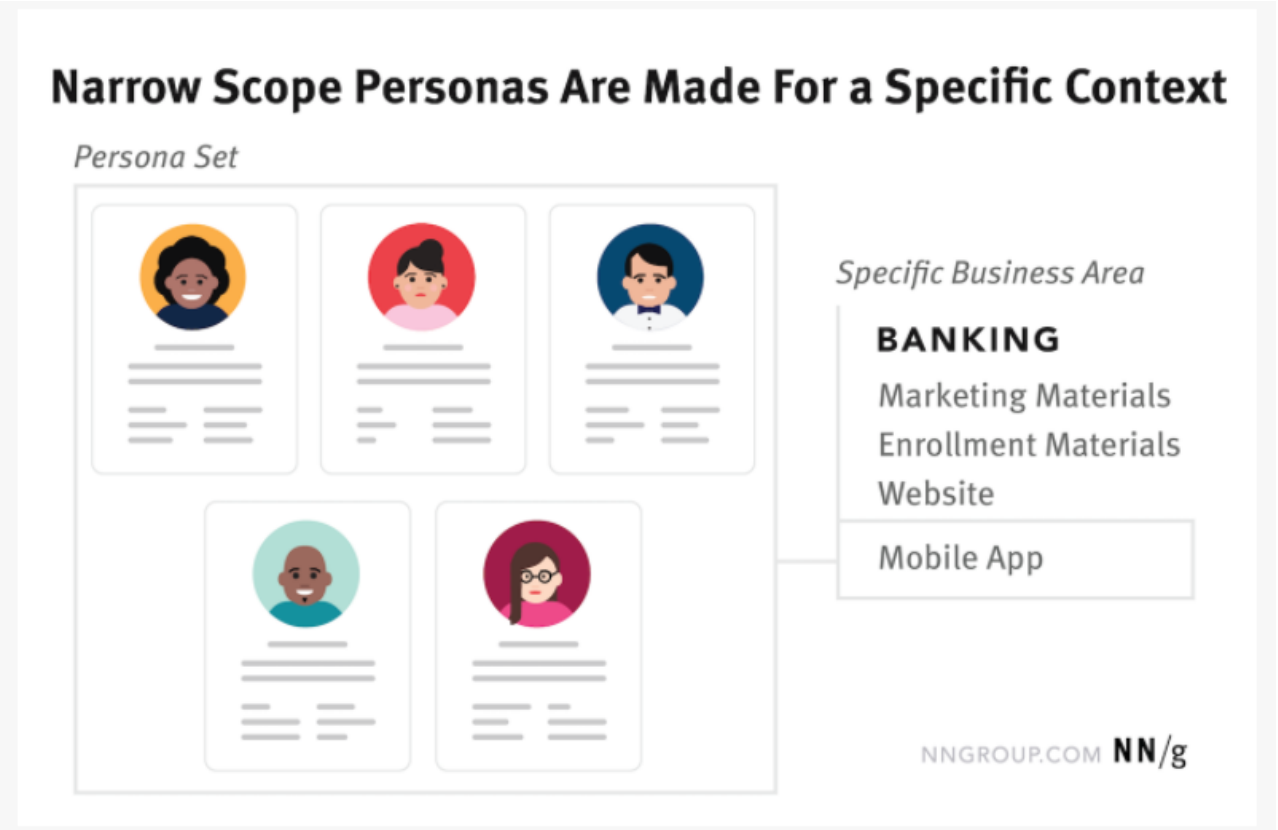

User persona – Broad scope

Jika satu kumpulan persona mewakili pelanggan perusahaan, persona ini akan memengaruhi beberapa area bisnis dengan banyak produk.

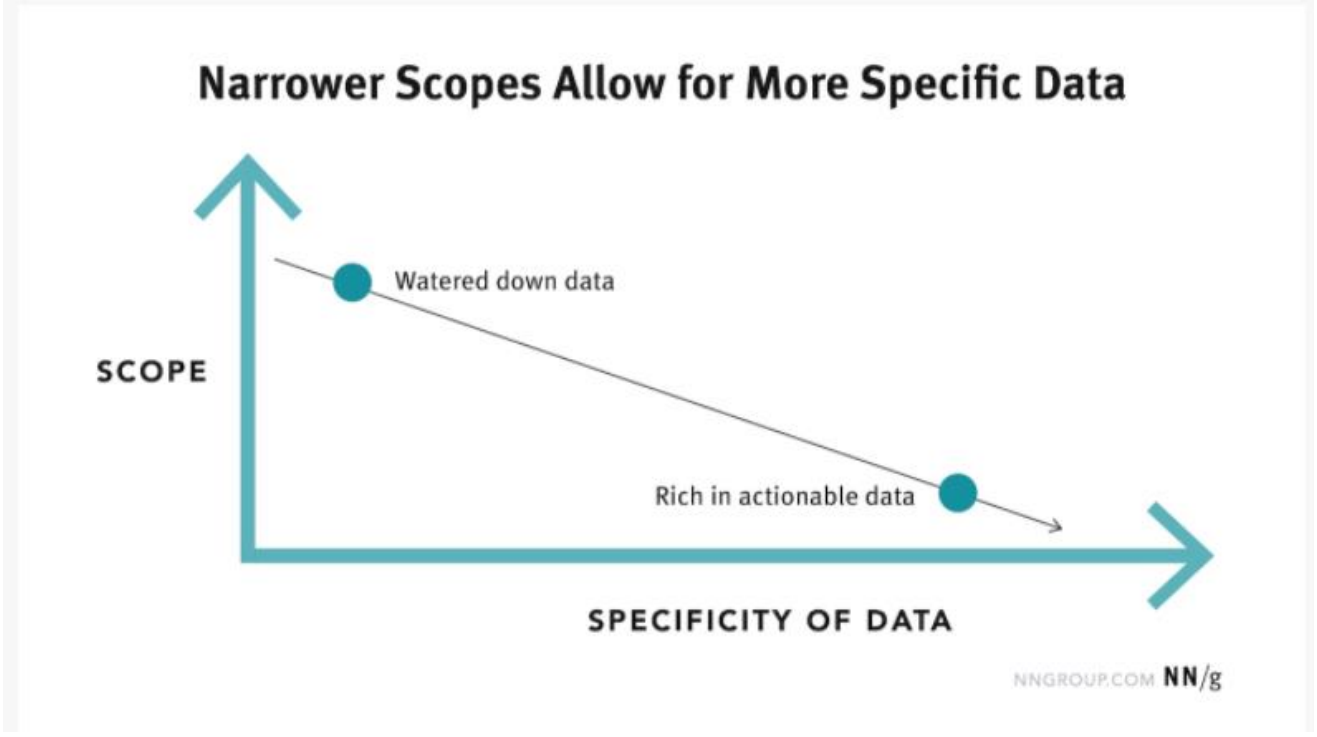

User persona – Narrow scope

Jika perusahaan membuat sekumpulan persona khusus untuk memandu desain ulang portal pengelolaan reksa dana, persona ini akan memiliki fokus yang sempit karena hanya akan memengaruhi satu lini bisnis.

User persona – Narrow scope

User persona

DEMOGRAPHICS

Age:	25
Location:	Sao Paulo, Brazil
Education:	Software Engineer
Job:	Q/A at Indie Game Company
Family:	Lives with her boyfriend

TECH

Internet	●●●●●
Social Networks	●●○○○
Messaging	●●●○○
Games	●●●●●
Online Shopping	●●●●○

GOALS

- Discovering new books / authors to read
- Finding unique stories
- Cataloging book collection

FRUSTRATIONS

- Keeping track of different series
- Forgetting a book launch date
- Finding space for more books

READING HABITS

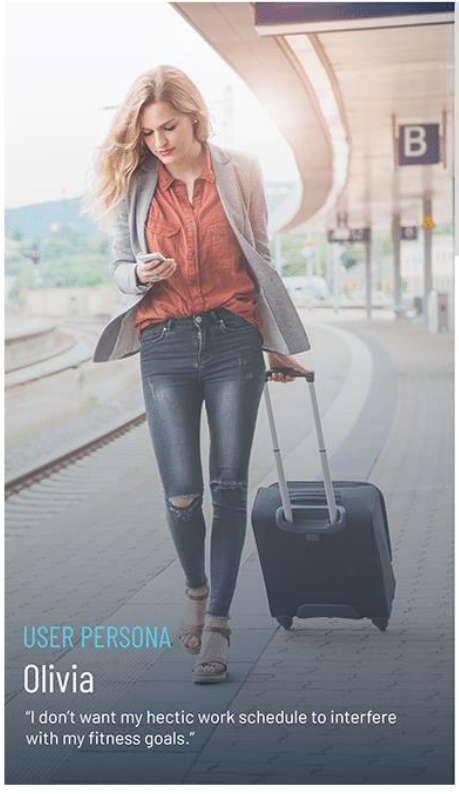

- Fast pace reader
- Never lends books
- Likes hardcovers and boxed collections
- Pre-order books to get them first
- Reads eBooks, but prefer physical copies
- Always finishes a book
- Loves binge reading and re-reading

FAVORITE BOOKS

American Gods — Neil Gaiman
Harry Potter — J.K. Rowling
Ready Player One

User persona

ABOUT

Olivia is a Public Relations and Communications Manager for a leading financial advisory and consulting firm. She prefers to be active in her free time, but travels a lot for work. Growing up, Olivia was active in sports and she continues to go to CrossFit and yoga classes as often as she can.

Age: 29

Work: PR Manager

Income: $80K to $100K

Status: Single

Location: Toronto, ON

NEEDS

To maintain an exercise routine that fits her changing work schedule.

To find drop-in fitness classes in new cities that don't require a membership.

The ability to pay for classes in advance to save time.

Recommendations to help determine the best class for her experience level

Extroverted | Leader

Independent | Athletic

FRUSTRATIONS

Travelling for work makes it difficult to keep a gym membership.

Using a web search to find classes that match her experience level is complicated and time-consuming.

Making a phone call to cancel a class if her work schedule changes.

Manually keeping track of classes she enjoys and would return to the next time she travels to the same city.

Empathy Map

Empathy Map

Empathy Mapping: **The First Step in Design Thinking**
Definition: An empathy map is a collaborative visualization used to articulate what we know about a particular type of user. It externalizes knowledge about users in order to 1) create a shared understanding of user needs, and 2) aid in decision making.
Summary: Visualizing user attitudes and behaviors in an empathy map helps UX teams align on a deep understanding of end users.
The mapping process also reveals any holes in existing user data.

Empathy Map - Format

Traditional empathy maps are split into 4 quadrants (Says, Thinks, Does, and Feels), with the user or persona in the middle. Empathy maps provide a glance into who a user is as a whole and are not chronological or sequential.

Format - *Says*

The Says quadrant contains what the user says out loud in an **interview** or some other usability study. Ideally, it contains verbatim and direct quotes from research.

“I am allegiant to Delta because I never have a bad experience.”

“I want something reliable.”

“I don’t understand what to do from here.”

Format - *Thinks*

The Thinks quadrant captures what the user is thinking throughout the experience. Ask yourself (from the qualitative research gathered): what occupies the user's thoughts? What matters to the user? It is possible to have the same content in both Says and Thinks.
However, pay special attention to what users think, but may not be willing to vocalize. Try to understand why they are reluctant to share — are they unsure, self-conscious, polite, or afraid to tell others something?
"This is really annoying."
"Am I dumb for not understanding this?"

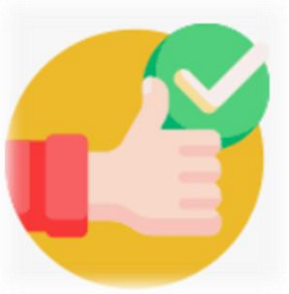

Format - *Does*

The **Does** quadrant encloses the actions the user takes. From the research, what does the user physically do? How does the user go about doing it?

Refreshes page several times.

Shops around to compare prices.

Format - *Feels*

The Feels quadrant is the user's emotional state, often represented as an adjective plus a short sentence for context. Ask yourself: what worries the user? What does the user get excited about? How does the user feel about the experience?

Impatient: pages load too slowly
Confused: too many contradictory prices
Worried: they are doing something wrong

One User vs Multiple-Users Emphaty Map

- *Empathy maps can capture one particular user or can reflect an aggregation of multiple users:*
  - **One-user (individual) empathy** maps are usually based on a user interview or a user's log from a diary study.
  - **Aggregated empathy maps** represent a user segment, rather than one particular user.
  - **Aggregated empathy maps** can also become ways to summarize other qualitative data like surveys and field studies. For example, an empathy map can be used **to communicate a persona**, instead of the traditional 'business card' approach.

How to Build Empathy Map?

➢1. Define scope and goals

- a. What user or persona will you map?

  Will you map a persona or an individual user? Always start with a 1:1 mapping (1 user/persona per empathy map). This means that, if you have multiple personas, there should be an empathy map for each.

- b. Define your primary purpose for empathy mapping.

  Is it to align the team on your user? If so, be sure everyone is present during the empathy-mapping activity. Is it to analyze an interview transcript? If so, set a clear scope and timebox your effort to ensure you have time to map multiple user interviews.

How to Build Empathy Map?

➢ **2. Gather materials**

- Your purpose should dictate the medium you use to create an empathy map. If you will be working with an entire team, have a large whiteboard, sticky notes, and markers readily available.

➢ **3. Collect research**

- Gather the research you will be using to fuel your empathy map. Empathy mapping is a qualitative method, so you will need qualitative inputs: user interviews, field studies, diary studies, listening sessions, or qualitative surveys.

How to Build Empathy Map?

➢ **2. Gather materials**

- Your purpose should dictate the medium you use to create an empathy map. If you will be working with an entire team, have a large whiteboard, sticky notes, and markers readily available.

➢ **3. Collect research**

- Gather the research you will be using to fuel your empathy map. Empathy mapping is a qualitative method, so you will need qualitative inputs: user interviews, field studies, diary studies, listening sessions, or qualitative surveys.

How to Build Empathy Map?

➢ **4. Individually generate sticky notes for each quadrant**

- Once you have research inputs, you can proceed to mapping as a team. In the beginning, everybody should read through the research individually. As each team member digests the data, they can fill out sticky notes that align to the four quadrants. Next, team members can add their notes to the map on the whiteboard.

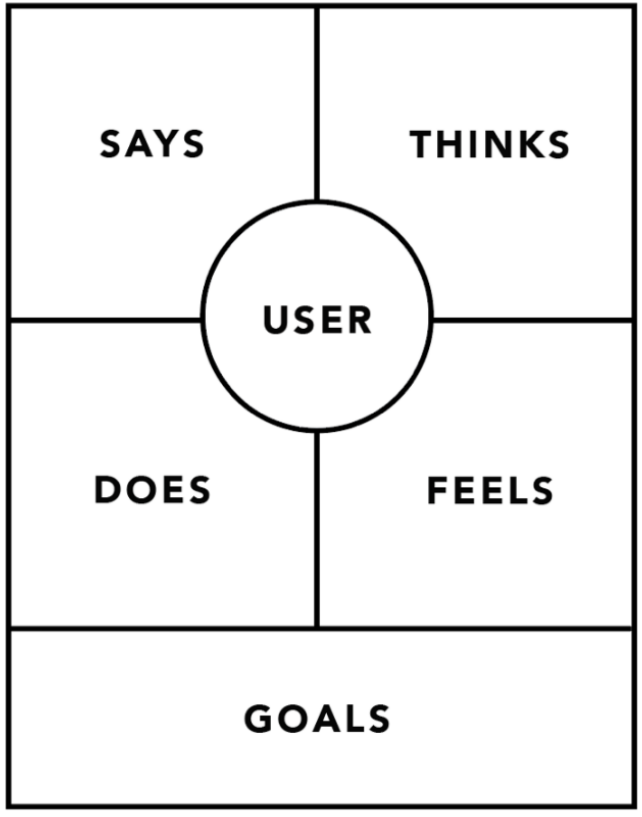

➢ **5. Converge to cluster and synthesize**

- In this step, the team moves through the stickies on the board collaboratively and clusters similar notes that belong to the same quadrant. Name your clusters with themes that represent each group (for example, “validation from others” or “research”). Repeat themes in each quadrant if necessary. The activity of clustering facilitates discussion and alignment — the goal being to arrive at a shared understanding of your user by all team members.

How to Build Empathy Map?

➢ **6. Polish and plan**

- If you feel that you need more detail or you have unique needs, adapt the map by including additional quadrants (like Goals the example below) or by increasing specificity to existing quadrants

GOAL

1 WHO are we empathizing with?

Who is the person we want to understand?
What is the situation they are in?
What is their role in the situation?

2 What do they need to DO?

What do they need to do differently?
What job(s) do they want or need to get done?
What decision(s) do they need to make?
How will we know they were successful?

7 What do they THINK and FEEL?

PAINS
What are their fears, frustrations, and anxieties?

GAINS
What are their wants, needs, hopes and dreams?

What other thoughts and feelings might motivate their behavior?

3 What do they SEE?

What do they see in the marketplace?
What do they see in their immediate environment?
What do they see others saying and doing?
What are they watching and reading?

4 What do they SAY?

What have we heard them say?
What can we imagine them saying?

5 What do they DO?

What do they do today?
What behavior have we observed?
What can we imagine them doing?

6 What do they HEAR?

What are they hearing others say?
What are they hearing from friends?
What are they hearing from colleagues?
What are they hearing secondhand?

User Journey dan User Flow

UI/UX

User Journey

- User Journey adalah tahapan aktivitas maupun skenario yang dilakukan oleh user saat menggunakan suatu produk atau layanan

User flow

- User Flow adalah tahapan aktivitas yang dilakukan oleh user untuk setiap tahapan User Journey.

Contoh:
User Journey & User Flow

UI/UX

Contoh

User Journey

1. User baru keluar dari Mall —
2. Lalu memesan ojek online —
3. Setelah itu menunggu ojek datang —
4. Setelah ojek datang user naik ojek —
5. Lalu mereka berangkat —
6. Dan sampai di lokasi tujuan user —

User Flow

1. Mulai dari membuka aplikasi —
2. Lalu memilih mobil atau motor — .
3. Lalu menentukan mau kemana —
4. Lalu menentukan mau dijemput dimana —
5. Lalu menekan tombol pesan —
